

# Remote Service Solutions

## PROVEN OPERATIONS SERVICES ENABLED BY ION'S CLOUD BASED SOLUTIONS

- Advanced project management
- Proven operational efficiency
- Scalability
- Reduced costs and crew levels
- Lower HSE exposure
- Less travel
- Improved carbon footprint
- 24/7 access to a team of ION technical experts

### KEY FEATURES AND BENEFITS:

#### → Operational Surveillance

Delivery by Software as a Service (SaaS) system to provide visualization and operational oversight via a common operational picture

#### → Remote Project Supervision / Monitoring

Monitoring of progress and display of key operational metrics

#### → SIMOPS Management

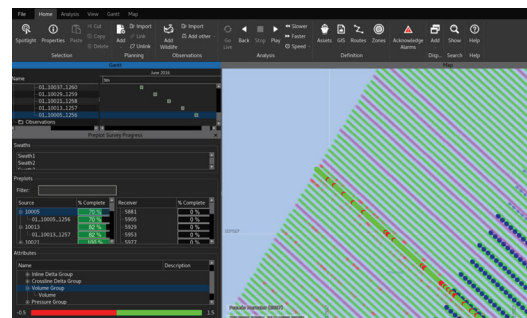

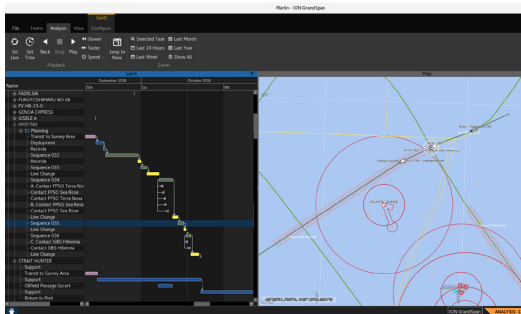

Remote task management and planning to enable efficient operations in complex environments

#### → Remote QC and Survey Progress

Provision of Navigation and QC services, attribute displays and continuous survey progress update

#### → Optimization Services

Daily project analysis and optimization to enable the delivery of most efficient and cost-effective operations

ION has been delivering innovative solutions to the energy industry for over 50 years and is the leading provider of real-time, multi-vessel positioning and control systems. For further information contact [cs1-sales@iongeo.com](mailto:cs1-sales@iongeo.com).

### About ION

ION is a technology leader with a strong history of innovation. Leveraging innovative technologies, ION creates value through data capture, analysis and optimization to enhance companies' critical decision-making abilities and returns. Our offerings are focused on improving E&P decision-making, enhancing reservoir management and optimizing offshore operations.
